OLYMPOS GİYOTİN CAM SİSTEMLERİ

Olympos Guillotine Glass Systems

Olympos Giyotin Cam Sistemi, genellikle büyük cam yüzeylerin açılabilir pencere olarak kullanılabilmesini sağlayan bir tür cam sistemi veya cam düzenlemesini ifade eder. Bu sistem, özellikle ticari binalarda, otellerde veya büyük yapılarda tercih edilen bir cam açma mekanizmasıdır.

Olympos Giyotin Cam Sistemi, mekanın doğal havalandırılması veya büyük cam yüzeylerin geçiş açıklıkları olarak kullanılabilmesi için idealdir. Özellikle güzel hava koşullarında iç ve dış mekan arasındaki geçişi kolaylaştırır.

Modern bina tasarımında popüler bir tercih haline gelmiştir. Estetik açıdan çekici ve dayanıklı olmaları, birçok yapı projesinde tercih edilmelerinin nedenlerindendir. Ayrıca, enerji tasarrufu ve iç mekan konforunu artırma potansiyeli sunarlar.

The Olympos Guillotine Glass System generally refers to a type of glass system or arrangement that allows large glass surfaces to be used as operable windows. This system is a preferred glass opening mechanism, especially in commercial buildings, hotels, or large structures.

The Olympos Guillotine Glass System is ideal for natural ventilation of the space or for serving as access openings in large glass surfaces. It particularly facilitates the transition between indoor and outdoor environments, especially in good weather conditions.

It has become a popular choice in modern building design. Their aesthetic appeal and durability are some of the reasons why they are preferred in many construction projects. Additionally, they offer the potential for energy savings and improving indoor comfort.

RAL renk standardına göre seçtiğiniz tüm renkler uygulanabilir.	*All the colours you have selected can be applied according to the RAL colour standard.*
Yağmur ve rüzgar gibi hava şartlarına son derece dayanıklıdır.	*It is extremely resistant to weather conditions such as rain and wind.*
Materyal // 6063 T5 alüminyum, paslanmaz çelik ve derlin.	*Materials // 6063 T5 aluminum, stainless steel and derlin.*

Alüminyum giyotin cam sistemleri, cam panelleri yukarı ve aşağı hareket ettiren bir çerçeve ve kaldırma mekanizması içerir. Bu sistem, pencereyi yarıya veya tamamen açarak hava sirkülasyonu sağlar ve dışarıdaki manzaranın keyfini çıkarmanıza olanak tanır.

Bu tür cam sistemlerinde kullanılan ana malzeme dayanıklı ve hafif olan alüminyumdur. Alüminyum, paslanmaz ve uzun ömürlü bir malzeme olduğu için iç ve dış mekanlarda kullanılmak üzere uygundur.

Bu sistemler, modern ve şık bir tasarıma sahiptir ve iç ve dış mekanların estetiğini artırabilir. Farklı renk ve bitki seçenekleri sunar, böylece mekana uygun bir tasarım seçilebilir.

"Aluminum guillotine glass systems consist of a frame and lifting mechanism that moves the glass panels up and down. This system allows for partial or complete window opening, facilitating air circulation and enabling you to enjoy the outdoor view."

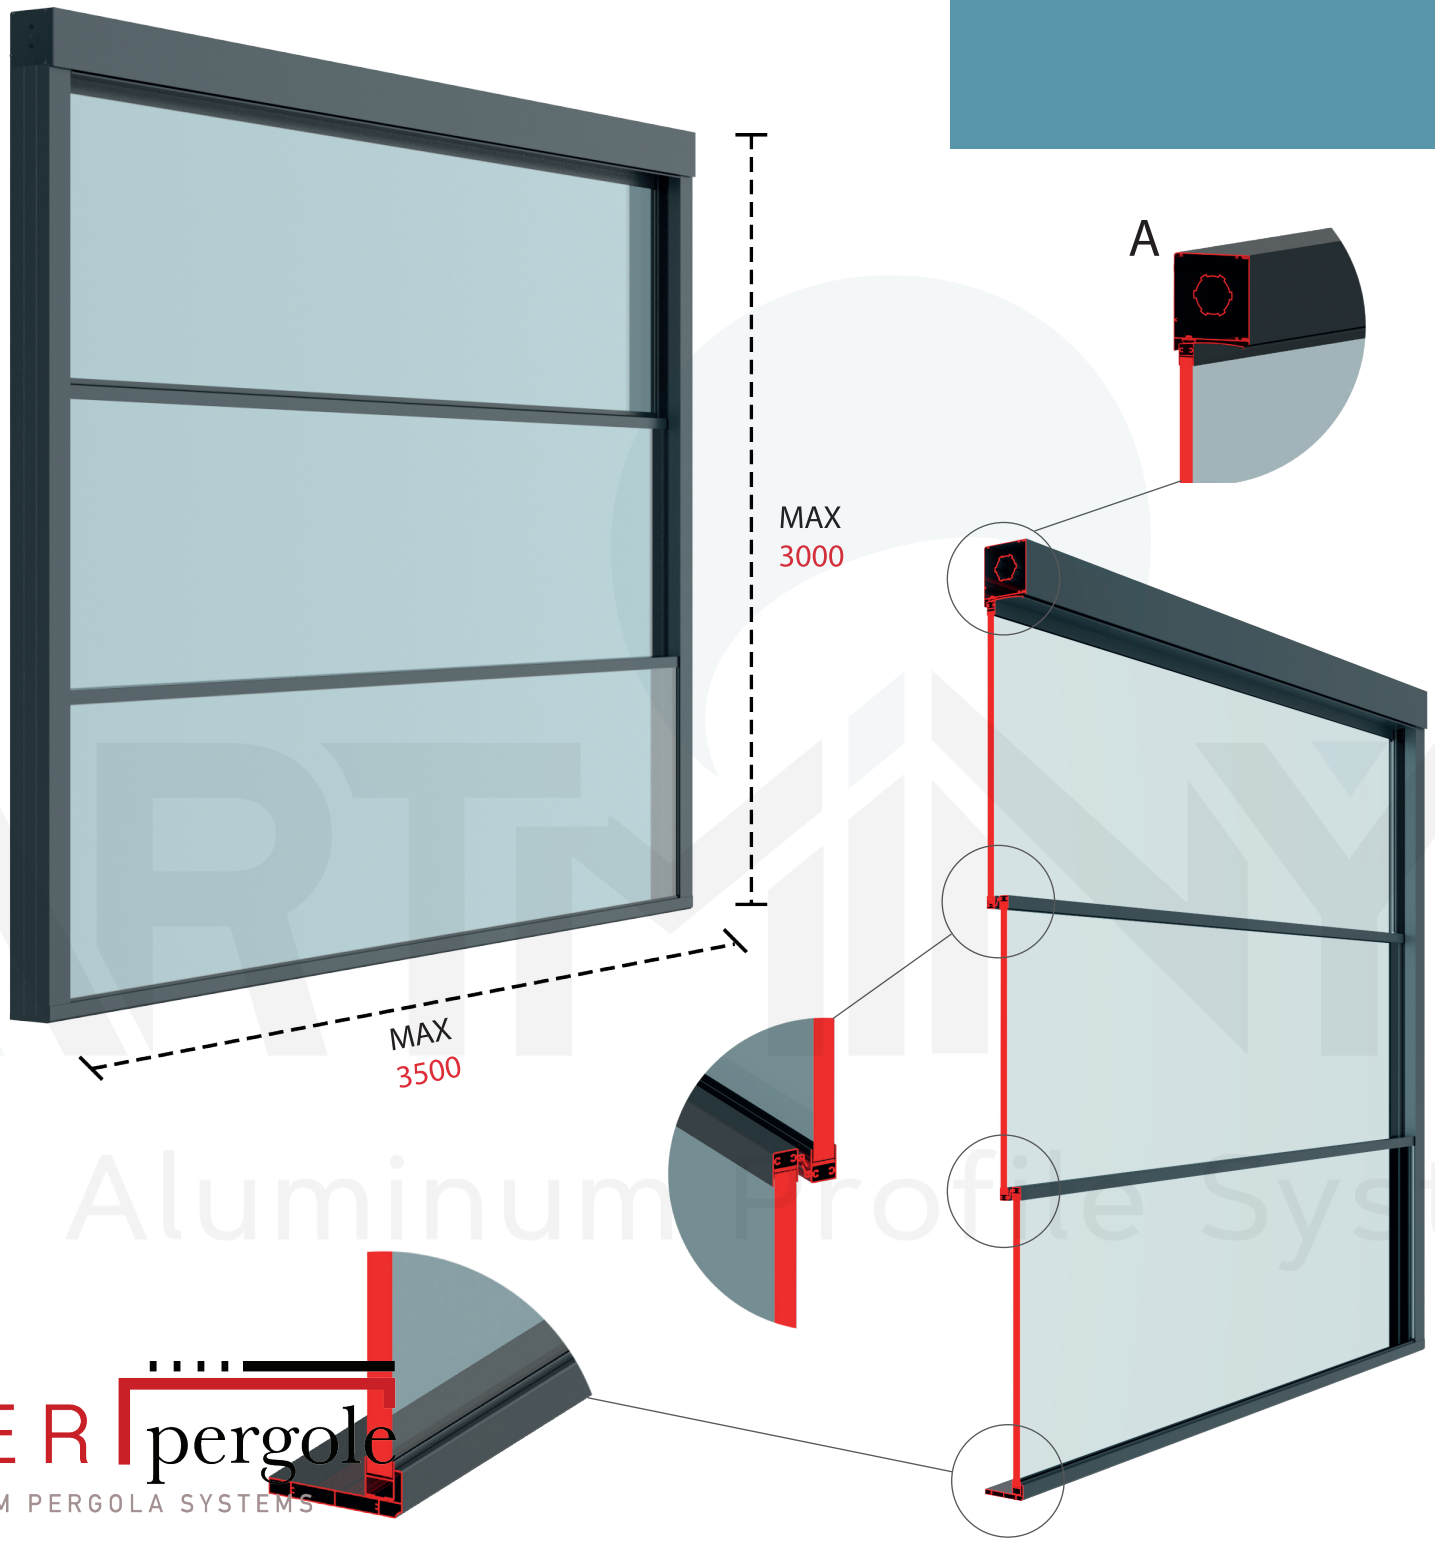

"The primary material used in such glass systems is durable and lightweight aluminum. Aluminum is resistant to corrosion and is a long-lasting material, making it suitable for both indoor and outdoor use."

"These systems have a modern and stylish design, enhancing the aesthetics of both interior and exterior spaces. They offer various color and plant options, allowing for a design that suits the space."
